*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chishti et al. (PCT Publication WO 98/58596 A1).

Chishti et al. disclose a computer implemented method, system, computer program on a tangible medium and computer system of separating a three-dimensional polygonal structure from an adjacent structure. The adjacent structure may include the extraneous gum area so as to leave only the tooth which increases data processing speed and enhances visual display (see page 17, line 16 through page 18, line 34) The method comprises defining a cutting surface using cubic B-spline curves, i.e. “piece-wise continuous curves”, and applying the cutting surface between the tooth and the structure to separate the tooth from the structure.

Claims 1-25 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Jones et al. (United States Patent No. 6,409,504)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37

CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

### ***Response to Arguments***

Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references. Merely reciting the language of the claim almost verbatim and then coming to the conclusion that “the cited reference fails to teach each and every element of the claimed invention” is not a proper argument specifically pointing out how the language of the claims patentably distinguishes them from the references. Applicant’s argument that upon applicant's review of Jones, applicant “was unable to find each and every element of current claim 1” also is an improper argument because applicant is not specifically pointing out how the language of the claims patentably distinguishes them from the references. To help applicant further understand the Jones reference as clear anticipation of the claims, applicant’s attention is directed to figure 1A showing the piece-wise continuous curve, the flow chart in figures 6, 8, 11, 14, 16, 18, 20, 21, 24, 28-31, 34, 36, 38 and 39; figures 19A, 35A-35F; column 1, line 43 through col. 3, line 42; col. 7, line 1 through column 9, line 27.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
